KNOW THE THERMALITE™ DIFFERENCE

AUSTRALIAS' LEADING SHUTTER

Thermalite™ Shutters

Thermalite Shutters have the look and feel of wood with several major advantages.

Made from dense polymer foam, Thermalite is a solid, non-toxic synthetic material.

Being 100% made from renewable synthetic material, no natural resources are destroyed in the manufacturing process.

Thermalite is water resistant, fire retardant and provides over 2-3 times the insulation of wood and vinyl shutters making it the ideal choice for both internal and external applications such as bathrooms, balconies, kitchens or anywhere around the home.

The superb painted finish on the Thermalite Shutters ensures they won't yellow like other shutters.

Our exclusive world patented Ultraclear system option has no visible control rod providing an uninterrupted view.

Thermalite Shutter's unique louvre tension system will never need tightening or adjusting. Thermalite Shutters have the longest and most comprehensive warranty in the window covering Industry.

Australian Made Thermalite™ Shutters

This unique environmentally friendly product can be found from the suburban home, in luxury hotels as well as numerous commercial projects throughout Australia.

Cost Reducing

Thermalite Shutters will save you money now and into the future by reducing the energy required for heating and cooling your home. Lowering insulation and maintenance costs and increasing the overall efficiency in your environment - reducing your carbon footprint.
